TENTATIVELY IDENTIFIED COMPOUNDS VIA GC/MS ANALYSIS - NIST LIBRARY DATABASE SEARCH

Sample ID	Analyte (TIC)	Method	Result	Units	Analyst
38206	Isopropyl alcohol	EPA 624	2.4	ug/L	SAT
38206	Limonene	EPA 624	< 0.5	ug/L	SAT
38206	3,7-dimethyl-3,7 octadiene	EPA 624	4.6	ug/L	SAT
38206	dimethyl disulfide	EPA 624	< 0.5	ug/L	SAT
38207	Isopropyl alcohol	EPA 624	1.0	ug/L	SAT

Sample was prepped via standard EPA methods using either EPA 624 or 625 following all applicable QC protocols
The Top 10 TIC's (>90% Statistical match to reference spectra) are reported where applicable
Concentrations are estimated using the nearest internal standard and are order of magnitude estimates
If there were less than 10 TIC's detected, only those detected were reported.
